

Data set for psychological experiments

Dear Colleague

Thank you for your interest in the SynTex experimental data. The set contains 60 textures that were used to perform experiments on human aesthetic perception. We provide the material solely for use in academic, non-profit research.

To receive the data for your research, please write an email to:

stefan.thumfart@profactor.at

containing:

your name, affiliation, a short description of the intended use of the texture images.

As already stated, these images are made freely available to non-profit researchers. They are expected not to make them available to the media (television, magazines, etc.) or to place them on the internet. Making these materials familiar to the general public can seriously compromise their value as stimuli in many research projects.

Thanks again for your interest,

Stefan Thumfart
